## Esteemed Clients: Powering Business Growth with Innovative Solutions

### AHMED ALSALMAN - RIYADH, KSA DIRECTOR GENERAL MINISTRY OF JUSTICE

I would like to thanks Fiaz and his crew for their professional services as they provided top notch resources from 2019 to 2023 in software development area from Senior Developers to UI/UX Designers. They were quick and spot-on every time. Definitely recommend them to anybody looking for solid tech recruitment.

### ERIC VANCE – VIRGINIA, USA

I don't give this feedback lightly. I have had the opportunity of working with many providers on projects. I have seen the full range of quality and skill. Innovazy may very well be the best provider I've ever worked with. I can not say enough good things about them. They did an excellent job on every task I gave them. I only regret that I can't continue to use them on this project (because the project was put on hold). I most certainly will ask them to work for me again. They have some unique abilities that I have found to be very rare. On multiple occasions I gave them tasks that other providers had failed at. Not only did they complete the assignment the way I wanted they did it in significantly less time than the others spent who never "figured it out". I only ask that you don't keep them so busy that they don't have time for my project :-).

## Esteemed Clients: Powering Business Growth with Innovative Solutions

### ALAN GREGERMAN – MARYLAND, UNITED STATES

I really enjoyed the opportunity to work with Fiaz and his team. They are very organized, talented, positive, and responsive. I was particularly appreciative of their flexibility and willingness to think about several different options for meeting my objectives and their ability to suggest ideas I had not thought of that would improve my results. If you are looking for support that will listen and then provide the right technical competence they are excellent. I also enjoyed all of my interactions with Fiaz as he is very creative, kind, and interesting to talk with. They clearly have a wealth of knowledge about web site development.
